

Cypress, Los Alamitos and Seal Beach Announce

# One-Year Commercial Recycling Pilot Program

The City of Cypress, in conjunction with the cities of Los Alamitos and Seal Beach, announces a free recycling program for one year to 100 commercial and multi-family account holders in the tri-city area. The cities aim to utilize this pilot program to increase recyclable materials diversion in the business sector by two to five percent.

Eligible parties will receive a site inspection of their property to ensure that it is suitable for the pilot program. The site inspection looks at the following criteria:

- Is there adequate enclosed space for a recycling bin at your business/dwelling?
- Will your business/dwelling generate enough recyclables to fill a bin on a regular basis?
- Would an additional recycling bin be allowed to be placed at your business/dwelling?
- This is a single year grant funded program; would your business/dwelling be interested in continuing the program and become financially responsible after the grant is complete?
- The recycling bin can only be used for recyclables. Chronic contamination can result in discontinuation, is your business/dwelling willing to accept this condition?
- If your business/dwelling currently has a recycling program would there be a benefit to increase the amount of bins available for use?
- Does your business/dwelling have a representative available to take responsibility for monitoring the program if you are selected?
